

Glen Otero
San Diego, California, United States (32.71, -117.15)

Contact Information:

- Email: gotero@linuxprophet.com
- LinkedIn: [linkedin.com/in/glenotero](https://www.linkedin.com/in/glenotero) (500 connections)
- Facebook: [facebook.com/glen.otero.7](https://www.facebook.com/glen.otero.7)

Professional Summary:

Highly skilled professional with expertise in cloud computing, databases, data analysis, high performance computing, system architecture, and various programming languages including Python, Perl, C, and Shell scripting. Proven experience in scientific computing, Linux, Unix, grid computing, bioinformatics, data mining, MySQL, enterprise software, SaaS, and storage.

Skills:

- Cloud Computing
- Databases (MySQL)
- Data Analysis
- High Performance Computing
- System Architecture
- Python
- Scientific Computing
- Linux
- Shell Scripting
- Algorithms
- Perl
- C
- Cluster
- Unix
- Grid Computing
- Bioinformatics
- Data Mining
- Enterprise Software
- SaaS
- Storage

Technical Expertise:

- Cloud computing and infrastructure
- Database design, implementation, and administration
- Data analysis using various tools and techniques
- High performance computing and system architecture
- Python scripting for data processing and automation
- Linux and Unix systems administration
- Shell scripting for automating tasks
- Algorithm development and optimization
- Perl programming for text processing and data manipulation
- C programming for low-level system development
- Cluster computing for distributed processing
- Bioinformatics tools and techniques
- Data mining algorithms and techniques
- Enterprise software design, implementation, and deployment
- SaaS architecture and deployment
- Storage systems and management

Education and Certifications:

[To be added]

Work Experience:

[To be added]

Projects and Open Source Contributions:

- GitHub: github.com/gotero (21 repositories, 0 forks, 0 stars)

Industry: Biotechnology

Location: San Diego, California, United States

Interests: [To be added]
